Description:

Pulled from the pages of the wildly popular ZooBorns blog, this picture book presents the most charming critters ever: baby animals, ranging from the adorable to the zany! Featuring full-color photographs on every page and a cozy text perfect for reading aloud, this book is bound to become a must-have for animal lovers of all ages.

Books with big pictures of young wild animals are not just for children! I love showing ZOOBURNS THE NEXT GENERATION to my adult, intelligent, often very sophisticated friends, and watching their faces as they begin to flip through the book, just to be polite. Gradually, they slow down, as they begin to take in the marvelous quality of the photos of new-born wild animals, the charm of the animals themselves, and the very soft

sell of a responsible approach to the conservation of these vulnerable species. Their faces tell it all--going from mild polite interest, to smiles as they take in the sheer beauty and joy these new-born animals radiate as they begin to explore, to laughter at the vitality of these precious animals at play. Please do yourself the favor of buying this book for yourself, and when you can finally let go of it to show it to your friends, do yourself the favor of watching their faces as they go from polite interest to smiles to laughter and joy. It happens every time.
